

Product Lens

a materials health assessment

COMPANY AND PRODUCT INFO

Issued to	Belden
Description	MediaTwist®, Datatwist® 6, & 5e; Riser Rated Category 6 and 5e, Horizontal and Patch cable UTP, 2 & 4 pair, Bonded and non-bonded Pair
For the Products	Part Numbers: 1229A1xxx, 1583Bxxx, 1588Axxx, 1700Axxx, 1700S6xxx, 1702Axxx, 1872Axxx, 1875GAxxx, 1875GBxxx, 7881Axxx, 7883Axxx,
Certification Period	January 2017- January 2019
Assessor	MBDC basis methodology v3.1*

Qualifications

- LEED BPDO Credit: Material Ingredients Option 1 Qualifies for as 1 product
- LEED BPDO Credit: Material Ingredients Option 2 Qualifies for 100% of cost

Other Achievements

MATERIALS / INGREDIENTS INFORMATION

Disclosure Level: 100 ppm 1000 ppm

The following table represents the top 99% of the material ingredient disclosure and ratings. For the full ingredient disclosure information, please see the table on the reverse side.

Materials	Result			
	Supply Chain/ MFG	Install	Use	End of Use
Copper	Yellow	Green	Green	Yellow
PVC	Red (I,D)	Yellow	Yellow	Red (I,D)
Flame Retardant	Yellow	Green	Green	Green
Polyolefin 1	Yellow	Green	Green	Green
FR Plasticizer	Red (I,D)	Yellow	Yellow	Red (I,D)
Plasticizer	Black	Black	Black	Black
Polyolefin 2	Green	Green	Green	Green
Proprietary	Green	Green	Green	Green

Exposure Indicator

D = Dermal, Skin
I = Inhalation, air
O = Oral, mouth

*No Indicator means no potential exposure scenario identified

Color Ratings

Green	Low or mild hazard identified and/or potential exposure
Yellow	Moderate hazard identified and/or potential exposure
Red	Problematic concern found. The combination of the hazard and potential exposure leads to some caution for some uses and/or applications.
Black	Cannot be fully assessed due to either lack of complete formulation, or lack of toxicological information for one or more ingredients.
Dark Grey	Highly problematic material containing one or more chemicals classified as CMR and having a plausible route of exposure.

Product Lens

a materials health assessment

Material	CAS Number	Role	%	MFG	Install	Use	End of Use	Comment
Copper	7440-50-8	Conductor	38-43					Highly toxic to aquatic organisms; however, this material is acceptable for use in all phases due to limited exposure opportunity to biosphere.
PVC	9002-86-2	Jacket/ Colorant	20-22	I.D			I.D	Lifecycle concerns around use of halogenated polymers.
Flame Retardant	Proprietary	Jacket	14-15					Skin sensitization and aquatic toxicity concerns, however, should be acceptable across all product stages.
Polyolefin 1	Proprietary	Insulation	9.5-10.5					Little to no risk across all product phases
FR Plasticizer	Proprietary	Jacket	6-6.5	I.D			I.D	Lifecycle concerns around use of halogenated polymers.
Plasticizer	Proprietary	Jacket	3.2-3.6					CMR - Reproductive toxin (CA Prop 65)
Polyolefin 2	Proprietary	Foam Separator	1.8-2.2					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	1.4-1.8					Little to no risk across all product phases
Flame Retardant	Proprietary	Jacket	0.6-0.8					Suspected human carcinogen (CA Prop 65, IARC Group 2B, MAK Group 2)
Plasticizer	Proprietary	Jacket	0.6-0.8					Little to no risk across all product phases
Proprietary	Proprietary	Colorant	0.6-0.8					Little to no risk across all product phases
Proprietary	Proprietary	Jacket/ Colorant	0.4-0.5					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0.2-0.4					Little to no risk across all product phases
Proprietary	Proprietary	Colorant	0.2-0.4					CMR -suspected endocrine disruptor and potential reproductive toxicant. (CA Prop 65)
Proprietary	Proprietary	Jacket	0.2-0.4					Severe damage to eyes possible during manufacturing phase; little to no risk across all other use phases
Proprietary	Proprietary	Jacket	0.2-0.4					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0.2-0.4					Little to no risk across all product phases
PET	25038-59-9	Ripcord	0.1-0.2					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0-0.2					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	0-0.15					Little to no risk across all product phases
Polyolefin 2	Proprietary	Colorant	>0.05					Little to no risk across all product phases
Proprietary	Proprietary	Jacket	>0.05					Skin sensitization and aquatic toxicity concerns, however, should be acceptable across all product stages.
Lubricant	Proprietary	Jacket	>0.05					Little to no risk across all product phases
Proprietary	Proprietary	Foam Separator	>0.05					CMR - Probable human carcinogen (Prop 65, EPA IRIS, EU REACH Annex XVII)
Proprietary	Proprietary	Jacket	>0.05					Little to no risk across all product phases

	Low or mild hazard identified and/or potential exposure
	Moderate hazard identified and/or potential exposure
	Problematic concern found. The combination of the hazard and potential exposure leads to some caution for some uses and/or applications.
	Cannot be fully assessed due to either lack of complete formulation, or lack of toxicological information for one or more ingredients.
	Highly problematic material containing one or more chemicals classified as CMR and having a plausible route of exposure.
