To Whom It May Concern:

Re: China RoHS Labeling Requirement

Belden Americas Division is currently in the process of updating our product information, literature, and labeling according to China RoHS as specified in Management Methods for the Control of Pollution from Electronic Information Products (Ministry of Information Industry Order #39) and Marking for the Control of Pollution Caused by Electronic Information Products (SJ/T T11364-2006). The electronic product literature located on the e-catalog at www.belden.com already contains the applicable China RoHS logo, and the environmental certificate of compliance will be updated by March 1, 2007. We are in the process of adding the China RoHS logo on the product label and expect this to take place within the next 60 to 90 days on new production. Please inquire again at that time regarding customer specific labeling requirements.

Thank you,

Sarah Gladding
Compound Development Engineer
Belden Americas Division
